

PRE-ASSEMBLED SPRING FLOOR KITS

We pride ourselves on our high standard of quality and fast turn-around.
 Here's what makes Norbert's Spring Floors the finest available!

THE WOOD

We use 9mm Baltic Birch (5' x 5' BBBB or BBBCP)—the highest grades available in the United States. The plywood panels are covered by a five-year warranty from warping or breaking under normal use. All cut edges are sanded to make handling easier for customers. We maintain a large inventory of raw materials in order to accommodate short turn-around situations and can build any size floor required.

THE CONNECTION SYSTEM

We use 4" hook & loop connector strips and we use "more of it" (8 times more than some manufacturers). The extra connector strips allows for a more secure connection, resulting in a floor that is less likely to warp and quieter in performance. Connection allows for strong adhesion—but it also makes removal and transport easier than any other floor construction method.

THE SPRINGS

We only use American Power Springs. Durable oil-tempered 2" x 4" spring with retainer caps that are resilient enough for gymnasts of all sizes and abilities.

THE SKIDDING

We custom-build 5' x 5' skids. This custom skid better protects the product and allows for more secure banding making it more stable for lift-gate deliveries. A combination of steel and vinyl banding ensures skid security. Then we corner-block and thoroughly stretch-wrap each skid, and clearly identify both ends of the skids.

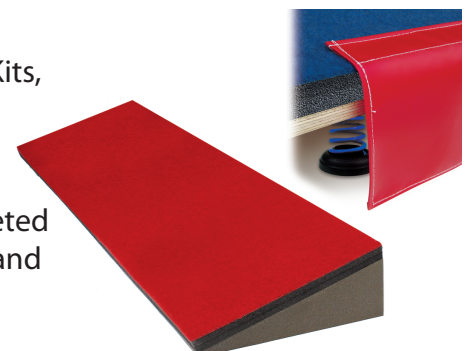

THE ASSEMBLY

We supply easy-to-follow (no tools required) assembly instructions. In addition, each cut board is labeled on its edge for easy identification. Assembly time will vary by size of floor and crew. For example, a crew of four can easily assemble a 42' x 42' floor in less than two hours.

OUR ACCESSORIES

In addition to our Spring Floor Kits, Norbert's also offers Carpeted Crosslink Foam, Floor Skirts, Border Wedges, Border Corners, Replacement Springs and Carpeted Floor Extension Systems. Hook and loop fasteners also available in multiple sizes and colors.
